RAPHS at a GLANCE FY1920

Service Providers

About Us

Rotorua Area Primary Health Services (RAPHS) is a community-based not-for-profit clinical network. We have been committed to improving health and wellbeing in the Rotorua region for nearly 30 years.

Public funding from the Ministry of Health & District Health Boards is received to:

- Provide health & wellbeing services for people enrolled with us through a member General Practice
- Provide targeted health & wellbeing initiatives for the local community through member and non-member practices and other health providers.

Additionally, health service providers purchase IT services and health technology support from RAPHS.

We work most closely with healthcare teams who provide health services to about 70,000 people in Rotorua, Mangakino and Murupara.

70,590 Enrolled service users

1:1,619 GP FTE: ESU

(from 1: 1,546 in FY1819)

16 x Member (PHO) general practices

2 x Non-member general practices

Lakes PrimeCare: Afterhours general practice

12 x Community Pharmacy

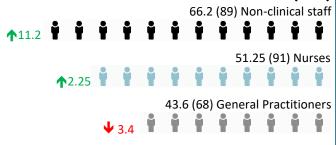

Rotovegas: Youth One Stop Shop

Sport Bay of Plenty: Green Prescription

QE Health: Psychology Services

ି QE Health: Dietician

Member Practice Workforce FTE (No.)

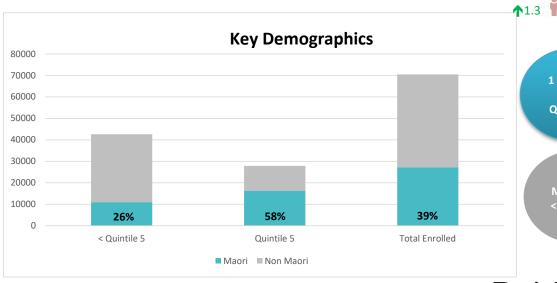

8.5 (10) Medical Care Assistants

1.5

↑3.15

4.3 (5) Nurse Practitioners 5.15 (6) Nurse Prescribers

Our Mission

RAPHS purpose is to enable high quality health & wellbeing services for our community; through supporting primary care services

Our Vision

To be an exemplar of person focused, integrated health & wellbeing services; that improve health system outcomes & equity

Our Values

- He ora te whakapiri: There is strength in unity. By working together we can do great things
- Whakaaro nui: To show respect towards all others
- Matatika: Acting fairly, ethically and with accountability

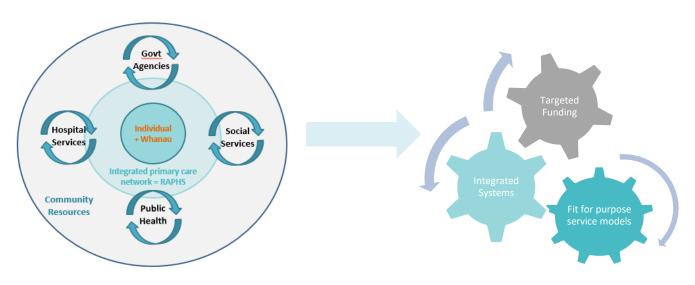

Our Goals

RAPHS improves the outcomes of services:

- Equity & quality of services
- Excellent patient & provider experience, and
- Efficiency, accountability and sustainability of services

FOCUS for CARE

Keeping people healthy

First Level general practice services for enrolled service users

Coordinated walk -in afterhours practice services including evenings and weekends, through Lakes PrimeCare

Care Coordination supporting people with long term conditions (LINC)

Support to LDHB immunisation service, for vaccine preventable diseases

Health Improvement
Practitioners, for
responsive mental
wellbing support (from
June 20)

Funding contribution to Youth One Stop Shop, to support responsive youth services

Prevention of readmission care packages

Serious Stable Mental Health Transition to primary care

Contraception and sexual health

Community based services

Diabetic Retinal screening, across all of the Lakes DHB rohe,including Taupo

Medicines Use Review services

Community dietician to support people with diabetes

Psychology support for people with long term conditions

Community-based social worker, for patient support and advocacy

Community-outreach nurses for complex care support in the home

Primary options for acute care

Opioid substituion

Clinical Pharmacists

Palliative Care

Strengthenin people

Community-based social worker, for coordinated patient support and advocacy

Green Prescription

Maternal packages of care

Host for Te Akatea service; supoprted service transition and health navigation

DESMOND

self-management training programme for people with diabetes

RAPHS health workforce development:

- Mental Health credentialling including staff training for staff from Rotovegas, practices, School nurses, DHB
- Te reo
- Cultural responsiveness
- Practice management forum

Quality Services

Shared Information with Lakes DHB and community Providers through PatentWise interface

Coordinated CME and CNE programme to support service delivery (RAPHS is an accredited provider)

Patient Experience Survey, connected to service improvement response

Compliance with health technology and security standards

Data quality standards to support monitoring & reporting of outcomes and equity of services

Support for provider compliance with Accrediation and H&DS Code

Telehealth enablement

INNOVATION & PARTNERSHIP

Change that makes a difference, enabled through working together to understand stakeholder needs

Our Approach

Empathy:

Working with others to inderstand need & challenges

Analysis:

Data & systematic analysis to identify opportunity & monitor change

Meaningful Innovation:

- Service improvements
- New services
- Changes to systems

Partnership Highlights in FY 1920

Joint delivery and collaboration: Te Akatea service; COVID Telehealth Call Centre; Mental Health Police Remand

Joint venture research with MOH to explore contributory influences to LDHB acute-bed days through joining up secondary and primary care data for RAPHS patients

Accepted in first tranche of national rollout of Health Improvement Practitioners with joint RFP from LDHB, Whanau Ora, RAPHS and Pinnacle

NIR – PMS data analysis to identify system errors and support service delivery for influenza vaccination.

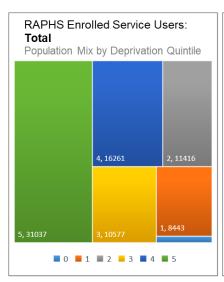

Putting Innovation into Practice Highlights of FY1920 ...

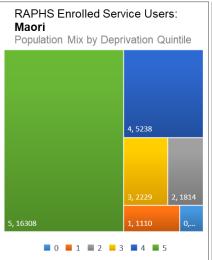

- Working groups with Alliance partners to support service improvement:
 - o Te Akatea
 - o ED frequent flyers
 - Long term conditions
 - o COPD
 - o ED attendees with no GP
- Virtual telehealth call centre to support Lakes DHB COVID-19 system response during Lockdown, provided clinical assessment, triage and results follow up for close to 5000 people across the district
- Working with Police to support access to care and support for mental wellbeing for victims and perpetuators of family harm
- Working with Whanau Ora to establish integrated service connections supporting mental health and wellbeing
- Data matching from NIR and PMS systems to support better reporting of influenza vaccination results – systems issues need to be addressed for better monitoring.
- Service utilisation project initiated as component of performance monitoring/data warehousing initiative – will support detailed business insight of provider workforce inputs matched to service provision and outcomes, beyond the traditional paradigm of FFS invoice counting.
- Telehealth deployment to support medical services and repeat prescription requirements for residents in the COVID-19 Isolation Hotels has been completed.
- RAPHS call centre (Practice Support) customer service review and experimentation with visual management dashboard.
- RAPHS terminal server hardware (PMS hosted environment for service providers) refreshed
- Compliance with MOH IT security penetration testing

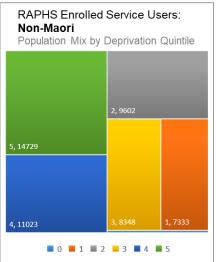

EQUITY of OUTCOMES

Enrolled Population

The RAPHS enrolled population is one of the most deprived communities in New Zealand. Prevalence of socio-economic impacts to health and wellbeing are substantive, and a major focus for RAPHS is to target initiatives to achieve good health for all and equity of health outcomes. COVID-19 lockdown for several months earlier in 2020 has significantly impacted service outcomes, with indications that this impacted access for Maori more than non-Maori. Results for the year ending 30 June 2020 are outlined below.

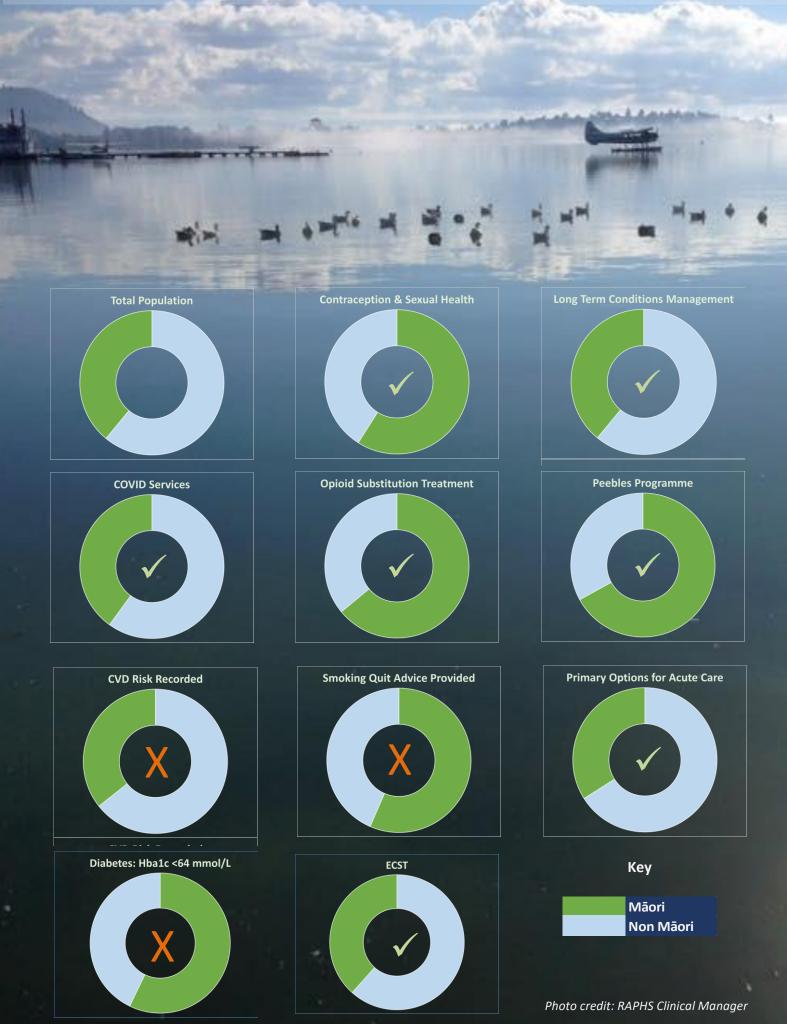

Equity	Summar	ies
KEY %		% service coverage for Maori equals or exceeds non-Maori, relative to eligible population
%		% service coverage for Maori achieved within 1-2% (margin of error)
	%	Inequity of service coverage for Maori

.	Ethnicity	Enrolled in Care Coordination Programme	Completed Annual Review	Eligible Population %	
Long Term Conditions	Māori	39% (1,760)	79% (1,389)	39%	
	Non Māori	61% (2,796)	80% (2,251)	61%	
RAPHS service provided in FY 1920		dividuals enrolled in a long-term conditions care programme. Includes nurse-led care h linkage to tailored care packages and annual review			
Comment	Access equitable	ccess equitable for Māori and Non-Māori			

Contraception & Sexual	Ethnicity	Total all Services	Long acting reversible contraception	Vasectomy	Sexual Health &/or Contraception Consult	Eligible Population %
Health Services	Māori	59% (1,106)	52% (166)	32% (6)	61% (934)	38%
	Non Māori	41% (763)	48% (155)	68% (13)	39% (594)	62%
RAPHS service provided in FY 1920	Total of 1,869 fully funded packages of care in general practice for provision of contraception and sexual health services (consults/ vasectomy/long acting reversible contraception) intended for people where cost would otherwise be a barrier to accessing service					
Comment Equity of service access achieved overall for provision of funded of services. Vasectomy remains a service focus for improved equity. Parti				•		

Equity of Access to RAPHS Services

Equity

General	Ethnicity	Total all Services	Virtual Consult	Face-to Face Assessment	Full Assessment	Eligible Population %
Practice COVID Services	Māori	40% (611)	38% (261)	42% (316)	36% (34)	39%
	Non Māori	60% (920)	62% (431)	58% (428)	64% (61)	61%
RAPHS service provided in FY 1920	for enrolled serv	otal of 1,531 fully funded packages of care in general practice for provision of COVID-19 services renrolled service users, including virtual and face-to-face consults (+/- swab), and full assessmen cluding swab for high risk patients; as per MOH guidelines.				
Comment	Equity of service access of service		overall for provisi	on of COVID-19 so	ervices, with some	e variation in

Opioid Substitution	Ethnicity	Transitioned to Primary Care Support	Total Population %		
Treatment	Māori	64% (14)	39%		
rreatment	Non Māori	36% (8)	61%		
RAPHS service provided in FY 1920	primary care, ar opioid addiction	programme provides support for transition from secondary mental health services to are, and provides general practice consults and prescribing for methadone treatment of diction. The LDHB OST SMO has identified a further cohort of patients who should be ed into shared care with GP practice within the next 12 months.			
Comment	Equity of service	e access achieved for Maori			

Peebles	Ethnicity	Transitioned to Primary Care Support	Total Population %
Programme	Māori	67% (38)	39%
	Non Māori	33% (19)	61%
RAPHS service provided in FY 1920	primary care, a practice, for pec	gramme provides support for transition from secondary and provides community-based care and support coordinates and support coordinates are supported in the secondary of patients who should be transitioned into shared care were supported in the secondary who should be transitioned in the shared care were supported in the shared care were supported in the secondary which is the secondary with the secondary supported in the secondary with the secon	dinated through general B OST SMO has identified
Comment	Equity of service	e access achieved for Maori	

	Ethnicity	People with Diabetes as % of total ESU (No.) [Prevalence by ethnicity]		Total Population %
Diabetes	Māori	57% (945)	2% (1,653) [6%]	39%
	Non Māori	70% (1,492)	3% (2,127) [5%]	61%
RAPHS service provided in FY 1920	RAPHS supports diabetes care coordination through general practices and care improvement packages including diabetes self-management training, dietician, insulin initiation support, retinal screening and psychology services, with separate contracts for diabetes community nursing/outreach held by other providers including general practices.			
Comment	No. of Māori with blood glucose <64 mmol/L is equitable relative to total population, but equity is not achieved overall due to higher prevalence of diabetes for Māori. RAPHS also benchmarks outcomes by provider and has an emerging evidence base for approaches that support achieving equity and improved outcomes.			

	Ethnicity	CVD Risk Recorded	No. eligible CVDRA	Smoking Quit Advice Provided	No. smokers
Risk Management	Māori	84% (7,089)	8,425	82% (5,219)	6,374
	Non Māori	88% (12,784)	14,495	89% (4,013)	4,509
RAPHS service provided in FY 1920	Access for Maori to practice-based risk lowering initiatives has not been achieved this year. Changes in service delivery modality (eg switch to telehealth during lockdown) contribute to this.				
Comment	Equity not achieved. Community-based outreach is being rolled out starting Nov 2020. Proposed partnership with Heart Foundation in the pipeline				

Primary Options for	Ethnicity	Primary Options for acute care	Total Population % (aged >15 yo)			
Acute Care	Māori	632 (34%)	34%			
	Non Māori	1,247 (66%)	66%			
RAPHS service provided in FY 1920	treatment for: c	Funded packages of care as an alternate to, or prevention of, admission to hospital. Services include treatment for: cellulitis, DVT, iron infusion, aclasta infusion, ED frequent flier care plan and follow up, renal colic, prevention of readmission.				
Comment	Equity relative to	population proportion achieved for Maori				

	Ethnicity	Funded Cervical Smear	Total Population % (women >25 yo)		
Cervical Smear	Māori	31% (1,384)	33%		
	Non Māori	69% (3,097)	67%		
RAPHS service provided in FY 1920		ical smears are for women who are overdue, never been screened, or high needs groups ates available funding to subsidise smears to practices based on their number of highen.			
Comment	Access nearing equity for Māori and Non-Māori				

RAPHS	Ethnicity	Clinical Pharmacist	Social Worker	Total Population % (aged >50%)	
Extended Care Team	Māori	33% (63)	51% (38)	26%	
(Case Mx)	Non Māori	67% (126)	37% (27)	74%	
RAPHS service provided in FY 1920	In addition to MDT case management and provider support by the RAPHS extended care team, Clinical Pharmacy and Social Work staff support complex patients.				
Comment Equity of service access achieved for Maori Note: Extended Care Team staff diverted to COVID response from March to June in 20				to June in 2020.
